

RFP Response: Enterprise Cloud Platform Modernization

Submitted By: Apex Systems Inc. | **Date:** 2026-08-01

1. Executive Summary & Requirement Understanding

Apex Systems offers a premier, high-security enterprise platform solution. We bring extensive engineering rigor designed for zero-downtime architecture and strict regulatory compliance.

2. Technical Capability & Architecture

Our architecture leverages microservices on Kubernetes (EKS), multi-region disaster recovery, automated CI/CD pipelines, and zero-trust IAM integration. Microsecond latency APIs guarantee high throughput and 99.999% availability.

3. Implementation Plan & Milestones

Delivery duration is 9 months structured in 4 phases: Discovery & Core Architecture (Months 1-2), System Migration (Months 3-5), Security Auditing & UAT (Months 6-7), and Final Rollout (Months 8-9). Dedicated team of 8 senior architects.

4. Commercial Value & Pricing

Component	Details	Cost (USD)
Core Platform Software	Enterprise License (3 Years)	\$150,000
Implementation & Engineering	9-Month Professional Services	\$80,000
Annual Premium Support	24/7 Managed Services	\$20,000
Total Commercial Price	Fixed Fee Contract	\$250,000

5. Security, Compliance & Risk Controls

Certified ISO 27001, SOC 2 Type II, and HIPAA compliant. Includes automated penetration testing, AES-256 encryption at rest, TLS 1.3 in transit, and continuous SIEM monitoring.

6. Support Model & Experience

10 years of enterprise experience with 15+ Fortune 500 reference projects. 24/7 Dedicated Tier-3 Support with 15-minute emergency SLA.
